To reset a channel - Display the channel to be reset, then press and hold the CHAN switch for four (4) seconds. After four seconds, the channel is reset maintaining all previous settings.

To reset a detector to the factory defaults - Press and hold all four switches (CHAN, FUNC, ▲, and ▼) simultaneously for five (5) seconds. All channels will be reset and all settings will be the factory defaults.

To change a setting - Display the channel to be modified, momentarily press the FUNC switch to step through the functions. To modify a displayed function, use the ▲ and/or ▼ switches to change the setting.

OPTION DEFINITIONS			
Option 1	Display Loop Inductance	Option 4	Noise Filter Disable
Option 2	Display % Inductance Change	Option 5	Phase Green Loop Compensation
Option 3	Extension Only On Green	Option 9	Queue Detection (2 Channels)
Option 10	Directional Detection (2 Channels)	Option 11	Audible Detect Signal
Option 12	Detector Disconnect		

OPTIONAL DISPLAY MODES	
Option 1	Display Loop Inductance
Option 2	Display % Inductance Change
Option 11	Audible Detect Signal
